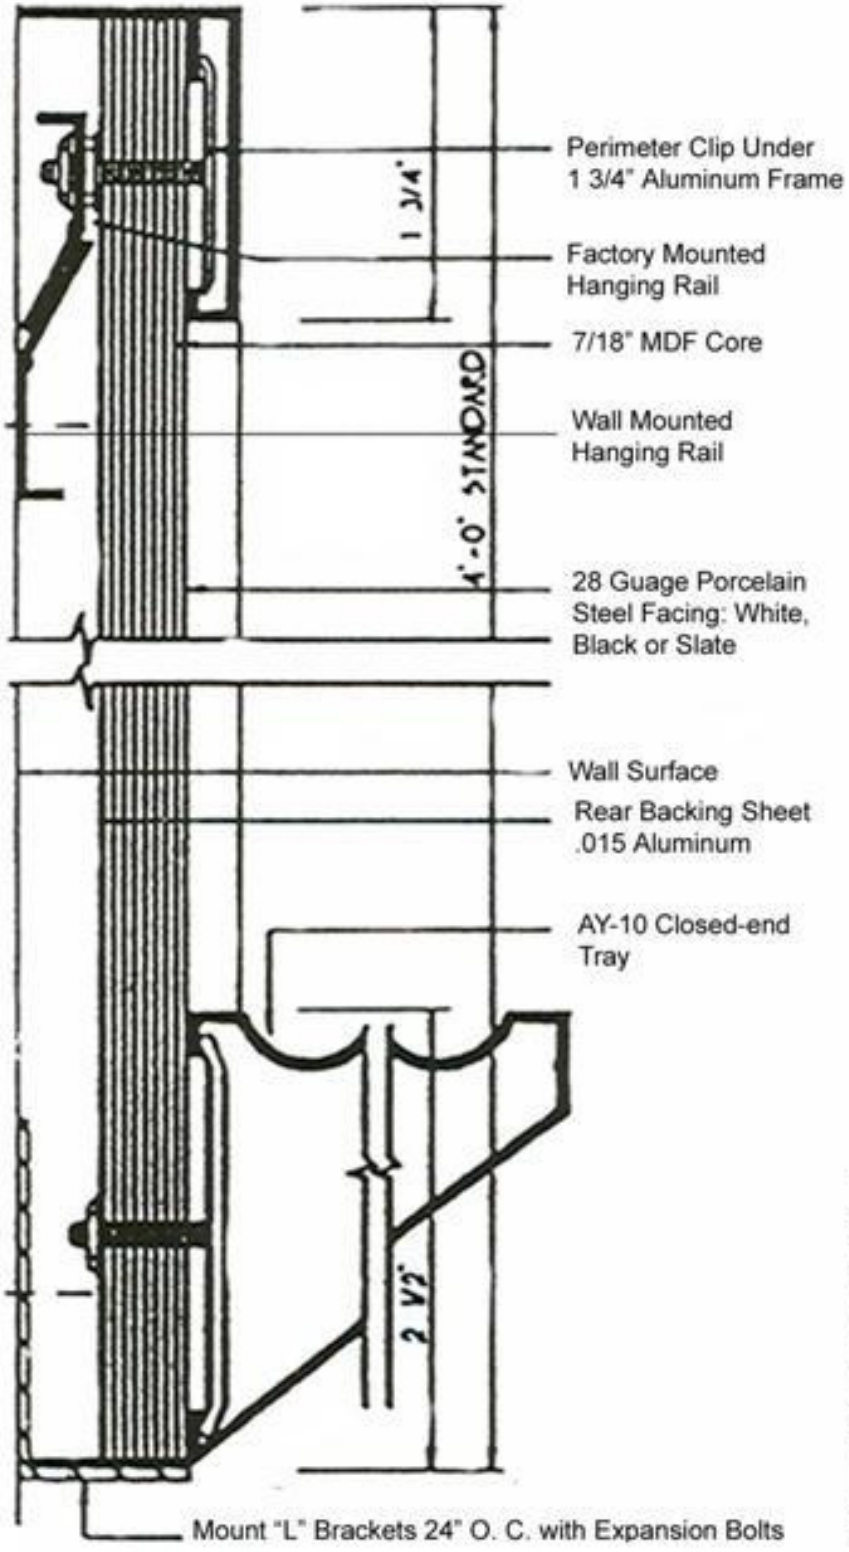
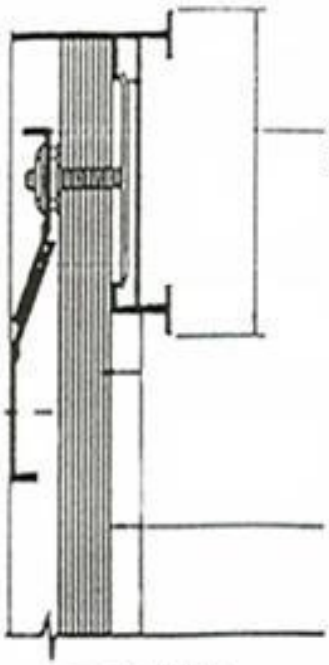
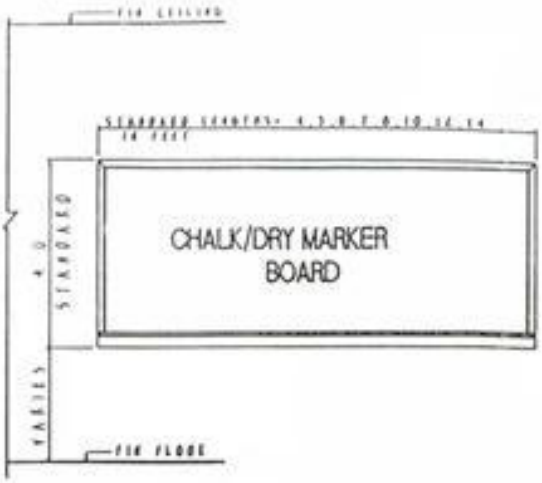
Big Apple
Chalk Boards & Marker Boards







The Big Apple Series (formerly named Reddi-Frame Clip Tite) represents the ultimate in design and function. Its unique design complies with the New York City Board of Education and the NYC School Construction Authority specifications. Most current NYC School's replacement chalk boards are Big Apple Series products. The standard full-length factory-installed mounting rail provides unsurpassed stability, safety and easy of installation. This unique mounting system uses the weight of the board to keep it pressed flush against the wall. The factory-installed heavy-duty aluminum chalk tray features a smooth closed-end design with no sharp edges. Options include a 1" or 2" Cork Display Rail.
